**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 37-51 are allowed.
2. The following is an examiner's statement of reasons for allowance: The closest prior art is Nakagawa et al (JP 63-190794) and Hinatsu (JP 63-159284). Nakagawa et al teaches a screw shaped blade is placed in a crucible for Czochralski growth of a single crystal and the crucible is rotated (Abstract and Figs 1-3). Nakagawa et al also teaches the blade member is removed prior to growth. Nakagawa et al does not teach or suggest rotating the crucible without rotating the blade member during growing, the blade member being located at a position adjacent to the inside bottom of the crucible. Hinatsu teaches a propeller in the melt during crystal growth and the propeller is rotating without rotating the crucible. Hinatsu does not teach or suggest rotating the crucible without rotating a blade member during growth.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
